Carron Industries has been an automotive supplier since 1950 when it was formed as Carron & Company. As a Tier 1 Engineering Service Supplier with an ISO 9001 certified quality system, they specialize in providing diversified automotive services supporting domestic and global OEM and production supplier programs.

Included in these services are engineering, design analysis, test, part fabrication, and vehicle assembly. Program content varies in scope and complexity from completely new chassis or body systems to subsystems such as a corporate steering column assembly. Similarly, manufacturing can provide support from limited prototype part fabrication to multiple full ground-up prototype vehicle assemblies. The majority of programs are supported from the initial concept phases through production launch. Test Operations offers a wide range of services from full vehicle testing such as modal analysis through component cycle testing and failure analysis.

Carron Industries cont'd

Dennis Schlueter will be discussing the business of Carron Industries with an additional focus on his work with Carron Classics, a business unit of Carron Industries headquartered in Dearborn Heights, MI. Carron Classics specializes in custom paint and show quality mechanical and body work that "Masterminds and Mends Muscle Cars". You can visit them at www.carronind.com.

EPC SYSTEMS EVENT PLANNED FOR APRIL

The SAE Continuing Professional Development Group has scheduled the Electronic Powertrain Controls TOPTEC on April 9-10, 2002 in Southfield, Michigan. This program will present the latest developments and ongoing research in Electronic Powertrain Controls by featuring expert speakers who represent some of the world's foremost specialists in automotive powertrain control. Both new engineering professionals and their more experienced counterparts can expect to obtain leading edge knowledge and information on electronic powertrain controls from this program. As an added learning opportunity, a special tour of AVL North America has been arranged for participants.

In addition to the TOPTEC and tour, an exceptional pre-TOPTEC workshop is planned on Monday, April 8, 2002 featuring discussion on Model-Based and Robust Control Systems Development. Professor Lino Guzzella will lead the workshop and discuss the critical feature of automotive control software design and its ability to provide assured reliability and robustness. Professor Guzzella brings experience and expertise in engine manufacturing, the supplier industry and academic distinction to provide an enjoyable and educational day. This workshop will provide an effective and deep appreciation of this vital subject.

For more information or to attend this program, contact SAE Customer Sales at 1-877-606-7323, e-mail at profdev@sae.org or visit the SAE web site at www.sae.org.
