Vegetarian plate available with advance request

**Reservations:**

Advance reservations are requested by **Friday, April 17th**. Company reps are listed on the last page. On-line reservations may be made at the section web site: <http://fortwayne.saessections.org/>

**The Supermileage® competition** provides engineering and technology students with a challenging design project that involves the development and construction of a single-person, fuel-efficient vehicle. Vehicles are powered by a small four-cycle engine. The vehicles will run a specified course with the vehicle obtaining the highest combined kilometers per liter (miles per gallon) rating plus design segment points winning the event. Students have the opportunity to set a world fuel economy record and increase public awareness of fuel economy. Engines are donated by Briggs & Stratton.

**Baja SAE®** consists of three regional competitions that simulate real-world engineering design projects and their related challenges. Engineering students are tasked to design and build an off-road vehicle that will survive the severe punishment of rough terrain and sometimes even water. The object of the competition is to provide SAE student members with a challenging project that involves the planning and manufacturing tasks found when introducing a new product to the consumer industrial market.

TRW Commercial Steering Systems is the world leader in the design, development and integration of commercial vehicle steering systems. Its technologically advanced products, superior service and global organization assure customers around the world of quality and dependability in commercial steering systems.
